Committee on Scientific Freedom and Responsibility: Communication to the Editor, AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE, 432.
Comparison of Cash Flow Streams, On **(Investment Criteria; Preference Ranking)**, H. J. LANDAU, 1218.
Comparison of Optimal and Adaptive Decision Mechanisms in an Organizational Setting, A **(Organization Design; Behavioral Theory of the Firm; Adaptive Decision Making)**, EDWIN H. NEAVE AND EDWARD R. PETERSEN, 810.
Competitive Scenario Modeling System, A **(Games/Group Decisions; Marketing — Competition)**, BIPLAB K. DUTTA AND WILLIAM R. KING, 261.
Consumer Preference Judgments: An Exposition with Empirical Applications **(Marketing — Buyer Behavior; Multi-Attribute Utility/Preference Theory; Decision Analysis)**, JEHOSHUA ELIASHBERG, 60.
Coverage Function for Interval Estimators of Simulation Response, A **(Simulation; Confidence Intervals)**, LEE W. SCHRUBEN, 18.
Data Related to Energy Use in Residential and Commercial Buildings, Review of **(Energy; Industries — Electric; Industries — Petroleum/Natural Gas)**, ERIC HIRST, 857.

Decision Analysis Model for a Serious Medical Problem **(Decision Analysis — Applications; Utility/Preference — Medical Applications),** DANIEL PEÑA SANCHEZ DE RIVERA, 707.

Demand for a Risky Asset, The **(Finance — Portfolio; Stochastic Dominance),** D. KIRIA AND W. T. ZIEMBA, 1158.

Design of Incentives in Business Firms — A Survey of Some Research, On the **(Organization Design; Corporate Incentives; Divisionalized Incentives),** L. PETER JENNERGREN, 180.

Deterministic Production Planning: Algorithms and Complexity **(Inventory/Production — Deterministic Models; Inventory/Production — Surveys; Dynamic Programming — Deterministic, Discrete Time),** M. FLORIAN, J. K. LENSTRA AND A. H. G. RINNODY KAN, 669.

Diagnostic Analysis of a Production and Distribution System **(Inventory/Production; Professional — Diagnosis),** ARNOLDO C. HAX, NICOLAS S. MAJLUF AND MARK PENDROCK, 871.

Diffusion of an Administrative Innovation, The **(Economics; Organizational Studies — Design; Research and Development),** DAVID J. TEECE, 464.

Disutility as a Probability: An Interpretation of Weighted Informational Measures **(Entropy; Information Theory),** HENRI THEIL, 1281.

Economics Approach to Modeling the Productivity of Computer Systems, An **(Input/Output Analysis; Computer Systems; Programming),** CHARLES H. KRIEBEL AND ARTUR RAVIV, 297.

Effects of Promotion by Seniority in Growth-Constrained Organizations, The **(Manpower Planning; Organizational Studies — Design),** ROBERT E. STANFORD, 680.

Efficiency of the Price, Budget, and Mixed Approaches under Varying *A Priori* Information Levels for Decentralized Planning, The **(Organization Design — Simulation; Resource Allocation; Budgeting; Transfer Pricing),** RICHARD M. BURTON AND BÖRGE OBEL, 401.

Erratum to "On a Production Allocation and Distribution Problem" **(Integer Programming; Distribution; Production Allocation),** THOMAS G. MAIRS, GLENN W. WAKEFIELD, ELLIS L. JOHNSON AND KURT SPIELBERG, 435.

Erratum to "Optimal Pilfering Policies for Dynamic Continuous Thieves" **(Marketing; Government — Services, Police; Industries — Security Services),** SURESH P. SETHI, 342.

Erratum to "Planning Horizon Procedures for Machine Replacement Models" **(Inventory/Production — Planning Horizons; Inventory/Production — Policies, Replacement),** SURESH P. SETHI AND SURESH CHAND, 342.

Erratum to "The Adoption Time Period for some Transportation Innovations" **(Research and Development; Transportation; Technology),** JOHN E. ETTLIE, 1285.

Estimation of a Longitudinal Model to Decompose the Effects of an Advertising Stimulus on Family Consumption **(Marketing — Advertising/Promotion; Marketing — Buyer Behavior),** RUSSELL S. WINER, 471.

Evaluating and Improving Resource Allocation for Navy Recruiting **(Organization Design; Navy Recruiting; Resource Allocation),** RICHARD C. MOREY AND JOHN M. MCCANN, 1198.

Evaluation of the Initial Year of Zero-Base Budgeting in the Federal Government, An **(Accounting — Operating Budgets; Zero-Base Budgeting),** VIRENDRA S. SHERLEKAR AND BURTON V. DEAN, 750.

Expected Utility and the Truncated Normal Distribution **(Finance — Capital Budgeting; Utility/Preference — Applications),** R. NORGAARD AND T. KILLEEN, 901.

External Communication and Project Performance: An Investigation into the Role of Gatekeepers **(Communications; Organizational Studies — Behavior; Research and Development),** MICHAEL L. TUSHMAN AND RALPH KATZ, 1071.

Finding All Solutions for a Class of Parametric Quadratic Integer Programming Problems **(Parametric Quadratic Integer Programming),** RICHARD D. MCBRIDE AND J. S. YORMARK, 784.

First-Offer Bargains **(Games/Group Decisions — Bargaining; Economics),** WILLIAM SAMUELSON, 155.

Formulating Blood Rotation Policies with Multiple Objectives **(Health Care — Blood Inventory Management; Mathematical Programming — Multiple Criteria; Goal Programming),** KENNETH E. KENDALL AND SANG M. LEE, 1145.

Framework for Research in Computer-Based Management Information Systems, A **(Management Information Systems; Computers),** BLAKE IVES, SCOTT HAMILTON AND GORDON B. DAVIS, 910.

Goal Programming Model for Planning Officer Accessions, A **(Goal Programming; Markoff Process; Military — Manpower),** E. S. BRES, D. BURNS, A. CHARNES AND W. W. COOPER, 773.

Humans vs. Computer Algorithms for the Plant Layout Problem **(Facilities/Equipment — Layout; Networks/Graphs — Applications),** THOMAS W. TRYBUS AND LEWIS D. HOPKINS, 570.

Impact of the Mode of Information Presentation on Learning and Performance, The **(Information Systems — Management; Man-Machine Systems; Organizational Studies — Information),** HENRY C. LUCAS, JR. AND NORMAN R. NIELSEN, 982.

Implicit Enumeration Algorithm for Quadratic Integer Programming, An **(Quadratic Integer Programming),** R. D. MCBRIDE AND J. S. YORMARK, 282.

Implicit Intransitivity under Majority Rule with Mixed Motions **(Games/Group Decisions — Voting; Utility/Preference — Theory),** MERRILL M. FLOOD, 312.

Influence of Decision Style on Decision Making Behavior, The **(Organizational Studies; Decision Making; Cognitive Style),** 371.

Information Processing Model of Organizational Perception, Strategy and Choice, An **(Information Processing; Strategic Decision Making; Simulation),** FRANCIS D. TUGGLE AND DONALD GERWIN, 575.

Integer Programming Models for Sales Resource Allocation **(Marketing; Marketing — Sales Force; Programming; Programming — Applications),** ANDRIS A. ZOLTNERS AND PRABHAKANT SINHA, 242.

Lagrangean Relaxation Algorith for the Two Duty Period Scheduling Problem, A **(Production/Scheduling — Personnel; Programming — Integer Algorithms),** FRED SHEPARDSON AND ROY E. MARSTEN, 274.

Land Management Model Using Dantzig-Wolfe Decomposition, A **(Large Scale Systems; Timber Management; Linear Programming Models),** L. NAZARETH, 510.

Linear Multiple Objective Problems with Interval Coefficients **(Multiple Objective Decision Making; Vector Optimization; Efficient Points; Admissible Points),** GABRIEL E. BITRAN, 694.

Longitudinal Model to Decompose the Effects of an Advertising Stimulus on Family Consumption, A **(Marketing — Advertising/Promotion; Buyer Behavior),** RUSSELL S. WINER, 78.

Long-Term Dependence and Least Squares Regression in Investment Analysis **(Long-Term Dependence; Self-Similar Process; Systematic Risk; Efficient Portfolios; Least Squares Regression),** MYRON T. GREENE AND BRUCE D. FIELITZ, 1031.

Management Science in the 1980s: Introduction, MARTIN K. STARR, 1189.

Management Science in the 1980s — from Roger A. Layton, Australia: Communication to the Editor, ROGER A. LAYTON, 1189.

Management Science in the 1980s — from Takehiko Matsuda, Japan: Communication to the Editor, TAKEHIKO MATSUDA, 1192.

Management Science in the 1980s — from Bertil Näslund: Communication to the Editor, 1195.
Managerial Response to Technological Innovation in Public Sector Organizations **(Government — Technology; Productivity; Economics; Politics)**, IRWIN FELLER, 1021.
Managerial Risk Preferences for Below-Target Returns **(Decision Making; Utility Preference; Targets)**, DAN J. LAUGHHUNN, JOHN W. PAYNE AND ROY CRUM, 1238.
Manpower Flows and the Innovation Process **(Research and Development; Organizational Studies — Personnel; Organizational Studies)**, JOHN E. ETTLIE, 1086.
Marginal Benefit of Adding Servers to *G/GI/m* Queues, On the **(Queues; Multiserver; Design of Queues)**, RICHARD R. WEBER, 946.
Marketing Applications of the Analytic Hierarchy Process **(Marketing; Corporate Planning; Resource Allocation)**, YORAM WIND AND THOMAS L. SAATY, 641.
Mathematical Programming Approach to Beef Feedlot Optimization, A **(Programming — Linear, Applications; Dynamic Programming — Applications; Industries — Agriculture/Food)**, JOHN J. GLEN, 524.
Mixed-Integer Programming Approach to Air Cargo Fleet Planning, A **(Integer Programming Application; Air Transportation)**, ROY E. MARSTEN AND MICHAEL R. MULLER, 1096.
"Modeling the Marketing Mix Decision for Industrial Products," A Comment on **(Industrial Marketing)**, PAUL W. FARRIS AND ROBERT D. BUZZELL, 97.
Modeling and Resolution of the Medium Term Energy Generation Planning Problem for a Large Hydro-Electric System **(National Resources — Energy; Nonlinear Programming — Applications)**, MELVILLE A. HANSCOM, LOUIS LAFOND, LEON LASDON AND GASTON PRONOVOST, 659.
Models for Affirmative Action Planning and Evaluation **(Organizational Studies — Manpower Planning; Education Systems — Planning; Markov Processes)**, DAVID S. P. HOPKINS, 994.
Multiple-Object, Discriminatory Auctions with Bidding Constraints: A Game-Theoretic Analysis **(Games — Bidding)**, THOMAS R. PALFREY, 835.
New Branching and Bounding Criteria for the Asymmetric Travelling Salesman Problem, Some **(Assignment Problem; Asymmetric TSP; Branch and Bound; Subtour Elimination)**, GIORGIO CARPANETO AND PAOLO TOTH, 736.
New Look at Production Switching Heuristics for the Aggregate Planning Problem," On "A **(Planning; Inventory/Production — Production Smoothing)**, ROGER C. VERGIN, 1185.
New Specification of the Multichain Policy Iteration Algorithm in Undiscounted Markov Renewal Programs, A **(Dynamic Programming — Markov, Finite State; Dynamic Programming — Semi-Markov)**, A. FEDERGRUEN AND D. SPREEN, 1211.
Node Elimination Procedure for Townsend's Algorithm for Solving the Single Machine Quadratic Penalty Function Scheduling Problem, A **(Production/Scheduling; Programming — Integer Algorithms, Branch and Bound)**, P. C. BAGGA AND K. R. KALRA, 633.
Optimal Inventories Based on Job Completion Rate for Repairs Requiring Multiple Items **(Inventory/Production; Military/Logistics; Reliability/Maintenance)**, STEPHEN A. SMITH, JOHN C. CHAMBERS AND ELI SHLIFER, 849.
Optimal Multi-Level Lot Sizing for Requirements Planning Systems **(Networks/Graphs — Applications; Inventory/Production; Material Requirements Planning)**, EARLE STEINBERG AND H. ALBERT NAPIER, 1258.
Optimal Resource Allocation between Spot and Package Demands **(Marketing; Marketing — Pricing)**, YORAM KINBERG, AMBAR G. RAO AND EPHRAIM F. SUDIT, 890.
Optimal Sizing of Records Used to Store Messages of Various Lengths **(Computers; Dynamic Programming — Applications; Record Sizing)**, RANEL E. ERICKSON AND HANAN LUSS, 796.
Parsimonious Description of the Hendry System," On "A **(Marketing — Competition; Probability — Entropy)**, JOEL R. RUBINSON, WILFRIED R. VANHONACKER AND FRANK M. BASS, 215.
PBDS: A Decision Support System for Regional Blood Management **(Health Care — Blood Inventory Management; Mathematical Programming — Applications; Decision Support Systems)**, GREGORY P. PRASTACOS AND ERIC BRODHEIM, 451.
Performance-Based Incentive Plans **(Incentives; Performance Measures; Preference Theory; Goals; Probabilistic Goals)**, RAKESH K. SARIN AND ROBERT L. WINKLER, 1131.
Pivot and Complement — A Heuristic for 0-1 Programming **(Programming — Integer Algorithms, Heuristic)**, EGON BALAS AND CLARENCE H. MARTIN, 86.
Planning for Industrial Estate Development in a Developing Economy **(Planning; Land Development; Linear Programming Applications)**, C. O. FONG, 1061.
Priority Update Intervals and Anomalies in Dynamic Ratio Type Job Shop Scheduling Rules **(Simulation — Applications; Production/Scheduling — Job Shop, Deterministic; Queues — Priority)**, NABIL R. ADAM AND JULIUS SURKIS, 0000.
Problems in Predicting New Product Growth for Consumer Durables **(Marketing — New Products; Forecasting; Industries — Electric/Electronic)**, ROGER M. HEELER AND THOMAS P. HUSTAD, 1007.
Quasi-Empirical Mapping of Optimal Scale of Enterprise, A **(Organizational Studies; Economics)**, JOHN W. SUTHERLAND, 963.
Queueing Inequality, Comments on a **(Queues; Multiserver; Inequalities)**, DANIEL P. HEYMEN, 954.
R&D Project Planning with Q-GERT Network Modeling and Simulation **(Project Management — GERT; Research and Development; Simulation)**, BERNARD W. TAYLOR III AND LAURENCE J. MOORE, 44.
Rand-HUD Fire Models: Communication to the Editor, RODRICK WALLACE AND DEBORAH WALLACE, 418.
References for the Ellipsoid Algorithm, Some **(Computational Complexity; Linear Programming Algorithms)**, PHILIP WOLFE, 747.
Relationship between Attributes, Brand Preference, and Choice: A Stochastic View, The **(Marketing — Buyer Behavior; Utility/Preference — Multiattribute; Probability — Stochastic Model Applications)**, JEAN-MARIE BLIN AND JOE A. DODSON, 606.
Reply to Farris and Buzzell's Comment on ADVISOR 2 Paper **(Industrial Marketing)**, GARY L. LILIEN, 101.
Reply to Robinson: Communication to the Editor, NATHANIEL H. LEFF, 434.
Response to Communication on Rand-HUD Fire Models: Communication to the Editor, JAN CHAIKEN, EDWARD IGNALL, PETER KOLESAR AND WARREN WALKER, 422.
Sample vs. Population: Mean-Variance Efficient Portfolios **(Portfolio Theory; Estimation)**, HAIM LEVEY AND YORAM KROLL, 1108.
Scheduling Jobs Subject to Nonhomogeneous Poisson Shocks **(Reliability — Shock Models, Optimal Design)**, MICHAEL L. PINEDO AND SHELDON M. ROSS, 0000.
Scheduling Jobs on Two Facilities to Minimize Makespan **(Production/Scheduling — Flow Shop; Programming — Integer, Applications)**, R. L. BULFIN AND R. G. PARKER, 202.
Scheduling of Network Television Programs **(Marketing — Competition; Integer Programming — Application; Industries — Communication)**, JEFFREY H. HOREN, 354.

Sensitivity Analysis in Leontief Substitution Systems **(Programming — Leontief Substitution)**, GARY J. KOEHLER AND ANDREW B. WHINSTON, 1272.

Single Facility Minimax Distance Problem under Stochastic Location of Demand, The **(Stochastic Location; Facility Location)**, ROBERT CARBONE AND ABRAHAM MEHREZ, 113.

Simple Inequalities for Multiserver Queues **(Queues; Multiserver; Inequalities)**, MATTHEW J. SOBEL, 951.

Simple Ranking Methods for Allocation of One Resource **(Nonlinear Programming Algorithms; Resource Allocation)**, PAUL H. ZIPKIN, 34.

Solution of Spatial Equilibrium Problems with Benders Decomposition **(Economics; Planning; Programming — Nonlinear)**, JOSEPH POLITO, BRUCE A. MCCARL AND THOMAS L. MORIN, 593.

Solving Large-Scale Symmetric Travelling Salesman Problems to Optimality **(Computation; Travelling Salesman Problem; Cutting-Plane Methods; Facets)**, HARLAN CROWDER AND MANFRED W. PADBERG, 495.

Stochastic Constrained Optimization Model for Determining Commercial Fishing Seasons, A **(Linear Programming Applications; Simulation; Government Regulation)**, NORMAN GAITHER, 143.

Structure in 5's: A Synthesis of the Research on Organization Design **(Organization Design; Organization Structures)**, HENRY MINTZBERG, 322.

Technological Forecasting — An Overview **(Forecasting; Forecasting — Applications)**, JOSEPH P. MARTINO, 28.

Testing for Vision Loss in Glaucoma Suspects **(Health Care — Diagnosis; Programming — Integer, Applications; Search and Surveillance)**, PETER KOLESAR, 439.

Theory of the U. S. Treasury Market Equilibrium, A **(Finance — Securities; Finance — Investment)**, JOHN Y. BARRY AND HERBERT F. AYRES, 539.

Translation of Gambles and Aspiration Level Effects in Risky Choice Behavior **(Decision Making; Aspiration Level; Utility Preference)**, JOHN W. PAYNE, DAN J. LAUGHHUNN AND ROY CRUM, 1039.

Turnpike Horizons for Production Planning **(Inventory/Production — Planning Horizons; Forecasting)**, GERALD L. THOMPSON AND SURESH P. SETHI, 229.

Utility Functions for Equity and Public Risk **(Utility/Preference — Theory)**, RALPH L. KEENEY, 345.

Variance Analysis Procedures As Motivational Devices **(Accounting; Information Systems — Management)**, STANLEY BAIMAN AND JOEL S. DEMSKI, 840.

Worst-Case Analysis of Heuristic Algorithms **(Programming — Integer Algorithms, Heuristic; Computational Complexity)**, MARSHALL L. FISHER, 1.
